

Storage Guide

Congratulations on choosing the easiest solution for self storage.

Anything heavy should be placed on the floor with lighter things on top of them. It is much easier to pack things into small boxes which are lighter to carry and easier to fit in tighter places.

You can use our free Cube blankets to cover surfaces of tables, cabinets etc – or you can use your blankets and towels etc. It is best to cover your goods whenever you are storing or transporting your things.

- Read through our Prohibited Items page. Ensure none of the prohibited items are stored in the Cube.
- Make sure you have read and understood your storage contract.
- Use our helpful Packing Guide to assist you in packing your belongings safely.
- Check all your important documents, clothes and necessary items are safely put away.
- Make sure the truck has a space to park and adequate room to unload the Cubes.
- If you're down a shared drive, let your neighbours know a storage truck is coming.
- Disassemble any large items - beds, bunks, trampolines, tables, outdoor toys etc.
- Disconnect any appliances you need to store.
- Double check around the house for anything you have forgotten to pack or put aside. Check in all the wardrobes and cupboards, under the house, in the shed and in the attic.
- If necessary, use an itinerary sheet to keep a record of your stored items.
- It is easier and faster to pack your Cube if you have uniform sized boxes. Check our packaging page for appropriate sizes.
- Start with the heavy and large items, like a chest of draws or bookshelf. Anything solid to stack boxes on top of. Load them on the floor against the front of the Cube.
- Continue loading heavier items on the floor and lighter items or boxes on top. Ensure your most delicate items are placed above everything else.
- Pack tightly so that nothing can move around. Use small boxes, cushions, toys etc to fill all spaces. That includes inside cupboards and shelves.
- Take advantage of the tying point and rope ties inside the Cube. Use them frequently to secure each new layer you create while packing.
- Good packing is the key to ensure your goods arrive at the other end without damage.
- Make sure you look after your body while loading your Cube. Bend your knees when picking up boxes or furniture. Let your legs do the work and not your BACK!

Please keep in mind that we cannot be held responsible for the way you pack or if anything becomes damaged in transit due to your packing. We will provide you any information you may need to make the process easier. Feel free to contact us if you have any further questions regarding the Cube packing process.
